Challenge

The agency IDEA was having performance issues in its virtual datacenter around storage and network that was difficult to manage and expensive to solve.

Solution

IDEA hired JmgVirtualConsulting professional services to optimize its virtual environment. Our optimization virtualization services use all the best practices recognized by the industry. We have been involved in the design of innovative IT solution based on our technologies and products that allow our customers to consolidate, optimize and support virtual datacenter infrastructures.

Benefits

- 3-fold improvement during the process of backup up virtual machines
- 2-fold improvement in network utilization through multipathing and JumboFrames
- 52% reduction in server utilization through optimization
- Avoided hiring additional full-time employee by using JmgVirtualConsulting consultancy services

Application areas

- Network Optimization
- Server Consolidation
- System Backup Optimization
- Virtualization
